

Procedure to book tickets

```
create procedure BookNewTicket(in cid int,in date date,in show_id int,in tickets int)
begin
declare isAvailable int default -1;
declare showId default -1
declare defaultPrice int default 100;
select show_id from shows where shows.show_id = show_id and shows.date=date
and shows.no_of_tickets >= tickets into showId;
if show_id != -1 then
INSERT INTO ticket(`show_id`,`theatre_no`,`seat_no`,`price`,date)
VALUES(showId,theatre_id,no_tickets,defaultPrice)

VALUES(now(),ciid,showId);
Update shows set  shows.no_of_tickets = shows.no_of_tickets - tickets where
show_id = showId
end if;
end //
delimiter
```

Procdeure of getting booking details

```
delimite
r //
create procedure GetBookingDetails(in customer_id int,in tid int)
begin
select * from Ticket as bd where bd.cid = cid and bd.tid = tid;
end //
delimiter ;
```
